

SAP PI/PO interfaces documentation in real time

The Problem

In order not to lose track of a large number of system integrations, an Excel list is often kept. Important company-internal additional information is listed in it. This can be the person responsible for an interface or the technical contact person on the customer side. The problem: At the time of saving, the Excel list is already outdated. In addition, updating is very time-consuming.

The solution

A web-based tool, either on-premises or in the cloud, allows you to create and manage individual interface lists. Data is automatically read from the SAP PI/PO and flows updated into the CIL - CiancIT Interface List. Thus, your list consists of real-time data from the SAP PI/PO and customer-specific fields that you can define and maintain yourself.

The Product | CIL - CiancIT Interface List

< CiancIT Interface List    

ID	Status	Description	Technical Contact	Business Contact	ICO
CIA1	Productive	Business Partner Export	 Michael Jordi  Ivo Birrer	 Antonio Cianciarulo	 BusinessPartnerERPReplicationOut http://sap.com/xiiA1S/Global.VXD
CIA2	Productive	Employee Master Data	 Stefan Zimara	 Toni Berlusconi	 INVOIC.INVOIC02 urn:sap-com:document:sap:doc:messages.VXD

- Available on premises or in the cloud
- Automatically updated SAP PI/PO data in the interface list
- Customized field types for contact representation; value helpers, date and status fields, ISR, IB, and other helpful field types
- Delivered templates that have been optimized together with our integration specialists over years to guarantee an optimal start-up
- Access to your interface list using an intuitive web application
- Authorizations can be designed down to the individual function using standard SAP authorization tools
- Management of internal and external contacts for your interfaces
- In addition to SAP PI/PO based interfaces, file/mail based interfaces of the SAP ERP can also be managed.
