

Praxedo SAP Adapter

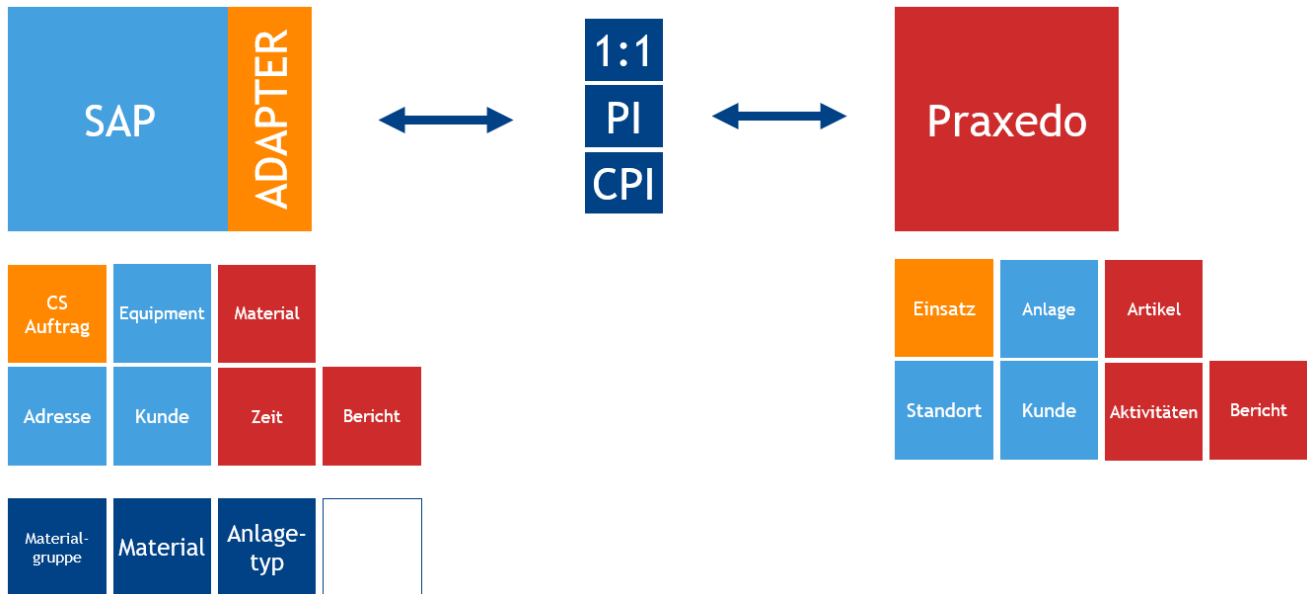

The problem

You want to connect Praxedo's cloud-based Field Service Management solution to your SAP system. Without Praxedo SAP Adapter, a time-consuming integration project with a customized solution is necessary. The development effort and costs are higher than when using a standard solution

The solution

The Praxedo SAP Adapter from CiancIT provides you with a connection between the FSM solution from Praxedo and your SAP system. In close cooperation with Praxedo GmbH, this adapter was optimally adapted to the needs of both systems. The standardization reduces the integration costs. At the same time, the adapter offers great flexibility for the implementation of customer requirements. Thus you get an optimal integration of the two systems.

The product | PRX - Praxedo SAP Adapter

- Quickly ready for use
- Individually expandable
- Reduced integration costs
